WORK EXPERIENCE 1

Infosys Limited (2015-Aug to 2019- Sept)

System Engineer

➤ **Core Developer – for Medtronic** (Health Care Global Leader)

- Involved in tasks such as setting up various environment, Hybris configuration management activities, data set-up etc.
- Involved in various Hybris Cron job creation , implementation of inbound flows to Hybris from SAP and supporting QA with defect resolution for SIT and UAT phases.
- Involved in analysing and resolving various front end issues and bugs(jsp)
- Played important role in data setup for different environments.

➤ **Production Consultant –(Hybris) for Reliance Ecommerce(AJIO, JIO, TRENDS):**

- Worked in real time production of AJIO.COM,RELIANCETRENDS.COM and JIO.COM.
- Involved in fixing the issues and defects raised in production phase of the project.
- Gained complete proficiency in various Hybris backend tools i.e HMC,HAC,CSCockpit etc and appropriate usage of knowledge in resolving real time customer issues.
- Gained command over total end to end flow of an ecommerce model and used it to fix various severity issues.

Senior System Engineer

➤ **Core Developer – for a well known UK based E-commerce Apparel store:**

- Worked in core modules such as Search and indexing using Search engine like Fredhopper.
- Involved in task such as new cron job creation required for pushing and pulling data to/from other system .
- Involved in the enhancement of existing functionalities and developing new features and enhancing the user experience by adding new features for UI from hybris side.
- Involved in providing support for testing as well as maintenance activities of different environments(DEV,SIT,UAT,PT).

➤ **Core Developer – for Reliance B2B e-commerce platform (MarketPlace)**

- Worked in creation of new API using REST services.
- Worked in core modules such as Cart (Add to cart, update cart etc).
- Involved in setting up initial data for dev as well as testing environment.
- Involved in migration as well as creation of new extensions and extending the OOB features like CSCockpit.
- Customization of CSCockpit (Addition of new components)
- Involved in creation of WCMS pages , components

➤ **Core Developer – for Japanese B2B e-commerce Website**

- Worked on analyzing the current functionalities of the system and providing scopes for improving the efficiency and performance of various functionalities.

- Involved in fixing various bugs and issues raised during the SIT phase of the project.
- Played an important role in actively supporting the team.

➤ **Core Developer – for Siemens Healthcare website.**

- Worked on resolving bugs and improving certain functionalities in the existing modules such as Products.
- Independently worked on a major POC to provide independent view of each webshop to customers who have access to multiple webshop. This allows a user to view products, cart and orders in each webshop independent of the other webshop he is part of. Received remarkable appreciation for this POC from client and got approval for real time development of the same.
- Worked independently on a major CR which displays the medical instruments taken for lease from Siemens that are shipped to the customer but usage reports not submitted by the customer. This new enhancement allowed the customer to view such instruments and provide reason for not submitting the usage reports. It also allows the admin to view all such records and update the same on behalf of customers.

WORK EXPERIENCE 2

Current Employer: **Accenture Technology Ltd** (2019 Oct – till date)

Application Development Sr. Analyst
